

Blue Rigid

Diameters: 0.039" - 0.315"

Lengths: 3.5" - 33"

Available now in addition to the traditional Hawkeye® line, the new Hawkeye Blue borescopes combine the value of Hawkeye borescopes with a wider variety of available options. The scopes contain high-quality, German-made optics and feature built in prisms that deliver superb image quality. Hawkeye Blue borescopes meet specialized visual inspection needs requiring advanced capabilities and performance.

All of the Hawkeye Blue rigid borescopes allow easy rotation of the direction of view by a full 360 degrees in order to thoroughly scan and inspect machined parts. The borescopes are available in diameters ranging from 1 to 8 mm and lengths up to 28 inches.

Blue Rigid borescopes accept the super bright Luxxor Light sources and Light Guides and have a removable handle allowing acceptance of the portable Hawkeye Nova light.
