

Borescope

Digital Camera System

Take crisp, clear, colorful photographs through Hawkeye borescopes with the easy-to-use Luxxor Digital Camera System.

The Sony DSC-H9 is remarkably effective for borescope photography.

- 8.1 MP 1/2.5" SuperHAD™ CCD sensor delivers quality prints.
- Borescopes create image circles proportional to their diameter. The 15X optical zoom lens adjusts magnification to fit the image to the frame.
- Steadyshot® Picture Stabilization counteracts camera and borescope "jitter" and "shake" without changing image quality.
- E-mail (VGA) modes
- Movie mode up to 30 frames/second.

Sony imaging software included with the Sony camera is compatible with Mac OS or Windows operating systems.

See our [Digital Camera FAQ](#) for information about using other digital cameras with Hawkeye borescopes.

Sony Digital Camera Kit includes Sony DSC-H9 camera, DCC-58 Camera Coupler, Luxxor Extension Tube for Sony H9, 256MB Memory Stick PRO, Hawkeye SuperNOVA Light, and SuperKit Carry Case.
