

PRECISION BORESCOPIES

Hawkeye Precision Borescopes

# Pro Flexible Kit

Length: 31.5" (0.8m) – FOV 45°

Diameter: 0.200" (5 mm) – 2-way articulation

**Optional 90° Prism Tip**

## Pro Flexible 0.200"

### Articulation at a great price

The Hawkeye Pro Flexible uses the same 18,000 fiber acid-leached imaging bundle as the Hawkeye Classic, and provides the same excellent resolution, sharpness, image detail, and contrast. Like the Classic Flexible, it comes equipped with the powerful, rechargeable SuperNOVA Light.

Unlike the Hawkeye Classic Flexible, the Hawkeye Pro Flexible borescope incorporates 2-way articulation! You control the direction-of-view of the tip over a 240° range (+/-120°), in a single plane, using a thumb-lever on the aluminium borescope body. Lock the lever to hold a particular view.

The Pro Flexible sets a new standard of excellence in quality and functionality, at a very reasonable price. Works great with [video](#).

A 90 degree prism tip is available as an optional accessory for those who need to view at 90° to the scope axis in small holes that prevent articulation.

**HAWKEYE PRO FLEX**  
Articulation at a Great Price

### Every Pro Flexible kit contains:

- Hawkeye Pro Flexible Precision Borescope
- 90° Mirror Tip
- Hawkeye SuperNOVA Light and Charger
- Rugged Aluminum Hawkeye Pro Carrying Case
